

The 5 R's to Zero Waste

We all know the importance of recycling, but if you're on a real mission against throwaways, you'll know it should be a last resort. Take a look at the pyramid below for the top steps for reducing waste. It is our aim to find the right suppliers who share our beliefs and together we help customers enhance their lives more sustainably and reduce our environmental impact.

Refuse

Be considerate of what you consume and avoid buying new unnecessary items.

Reduce

Minimise the use of wasteful products and packaging.

Reuse

Give things new lease of life and purpose. Reusable glass bottles are our speciality, simply rinse, return and repeat.

Recycle

Sort your waste correctly and minimise what you send to landfill.

Rot

Turn your kitchen scraps into compost or set up your own worm composting bin.
